Pre-Installation Notes:

We strive to give you high quality no hassle parts, we recommend that you fit the part to your vehicle and perform any modifications needed for proper fit prior to final prepping and painting of the eyelids.

To ensure the fullest life of these eyelids, we highly recommend that you prep and paint the eyelids. This will not only enhance the look of the eyelids, but also keep out any harmful elements that they may be exposed to during daily driving conditions.

These installation instructions were written using a 2004 Mazda3. Other year Mazdaspeed3/Mazda3 models will be similar.

Detailed Instructions

1. Pre-Fit the Eyelids

Open the hood and test fit the eyelids before final install to ensure fitment.

-  If painting the eyelids, be sure to get them painted prior to final installation as it is difficult to remove them. When reinstalling the eyelids you will need to purchase new adhesive mounting tape.
-  It is HIGHLY recommended that you prep & paint the eyelids prior to installation. ([Read Article on our Knowledgebase](#))

2. Clean Headlights

Use rubbing alcohol to clean the headlight housing to make sure there are no contaminants on the lights that would affect the 3M tape properly securing the eyelid to the headlight assembly.

-  This is a great time to polish your headlights with plastic polish to restore them to original condition.

3. Adhere Eyelids

- Cut the 3M tape and press firmly to adhere it to the underside of the eyelids ([figure 1a](#))
- Remove the red backing from the 3M tape and position the eyelids on the headlights. Press firmly on the eyelids to ensure proper adhesion.

 Be very careful to ensure that you are placing the eyelid in the correct position and on the correct side.

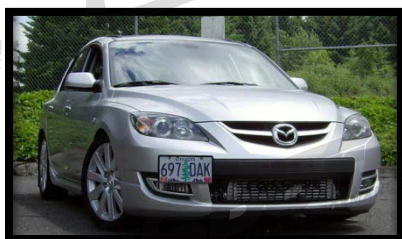

Figure 1a

This completes the installation of your Eyelids. After you have had an opportunity to drive with the eyelids on, double check them and make sure they are on securely.

What's Next:

[CorkSport License Plate Relocation Kit](#)

The relocation of the front plate gives a visual boost to your 2007-2009 Mazda 3 and Mazdaspeed 3 with the plate offset to the passenger side of the front bumper. By utilizing the tow bolt location our kit does not require you to drill holes into your bumper like the stock mounting requires.
